What is the difference between Macros and Tools? Mainly, a tool is an application which was created to help you achieve a specific task. While a Macro is software code that helps you to accomplish a task automatically. Macros are powerful, but also the most dangerous of Excel's tools because most are created by skilled users. A Macro is usually the only solution to large problems in an Excel document. The bad thing about Macros is that they can create damage in a document and are usually

expensive to repair. Many useful Macros can be used for free. On the contrary, a tool is usually an application created by a skilled user and therefore will create many less harm in a document. The good thing about tools is that you will be able to easily find many of them on the Internet. Note: Macros can be saved as templates and therefore, you can use them for free but not over the Internet. How to get a License Key? You can pay via Credit Card (via Paypal 1d6a3396d6
